

As part of the Indian Aditya Birla Chemicals Group, **CTP Advanced Materials GmbH** is a global chemical company specializing in the development and production of epoxy hardeners and modified epoxy resins. In connection with our support service, our products are used in particular for the protection of civil engineering structures, as industrial floor and water protection coatings. But also, for the manufacture of rotor blades for wind turbines, automotive construction and casting resins for mineral cast beds for machine tools and electrical insulation materials. Experience and innovation, absolute customer orientation and a high level of quality awareness are the foundations of our continuous growth.

In order to remain successful, we are looking for a motivated and committed person to support our sales team to join immediately
